

- : This key bit is guessed by the upper part of the attack
 - : This state bit can be computed by the upper part of the attack
 - : This state bit is guessed by the upper part of the attack
 - : This key bit is guessed by the lower part of the attack
 - : This state bit can be computed by the lower part of the attack
-
- 0 : The difference on this bit is 0
 - 1 : The difference on this bit is 1
 - ? : The difference on this bit can be 0 or 1
 - P : The difference on this bit is considered 0 by probabilist propagation
 - : This bit takes all possible values
 - : The value of this bit is fix for a specific structure
